

Genetic Technologist Sought for Exciting Opportunity with a New Biotechnology Diagnostics Company in London, Ontario

Cytognomix Inc (www.cytognomix.com), a start-up biotech company engaged in development of DNA hybridization probes for clinical and research applications, has an opening for a highly motivated technologist knowledgeable in concepts in human genetics.

This position involves research and development skills. Experience in molecular biology techniques including long PCR amplification, enzymatic and chemical labeling of DNA, FISH , and automated microscopy are preferred . Problem-solving abilities and work with minimal supervision are essential. A background in nucleic acid chemistry would also be an asset but is not essential. *We are particularly interested in recruiting a recent graduate with relevant experience*, but we will train you in those areas needed to perform assigned tasks.

For the right individual, opportunities for promotion will be extended based on performance, with the potential for future equity participation.

Interested applicants should submit their resume and three references to info@cytognomix.com.
